Projects

Employee Management System

Java · Spring Boot · React.js · MySQL · REST API

- Architected a full-stack Employee Management System, enabling streamlined CRUD operations for employee records and organizational data using Spring Boot and React.js.
- Designed and exposed RESTful APIs for employee registration, search, update, and deletion, following MVC architecture for scalability and maintainability.
- Optimized MySQL database schema and queries, reducing data retrieval time and ensuring reliable transactional integrity.

Full-Stack E-Commerce Web Application

Java · JDBC · MySQL · HTML · CSS · JavaScript

- Developed an end-to-end e-commerce platform featuring product catalog management, shopping cart, and order processing modules using Java and JDBC.
- Implemented JDBC-based backend connectivity with efficient CRUD operations across multiple MySQL tables, managing inventory, orders, and customer transactions.
- Designed responsive, cross-device compatible UI using HTML5, CSS3, and JavaScript, improving engagement and usability.
